

Your Security Journey Starts HERE

The **ASSESS** module in MyCISO empowers Security Leaders to evaluate and improve cybersecurity maturity, offering multi-framework security assessments, gap and risk analysis, and consultant-grade reporting - without the high costs of external consultants.

By streamlining security program management, MyCISO guides users through a workflow-driven approach, culminating in a customised security improvement strategy aligned with business objectives. With a data-driven focus on risk reduction, MyCISO **ASSESS** ensures that security initiatives are prioritised for maximum impact, keeping organisations on track in their cybersecurity journey.

"With MyCISO we have a consistent, flexible and efficient way to run the program, report on maturity either globally or locally, and provide confidence to the board that we are pushing the needle in the right direction."

Stephen Bennett, Global CISO - Domino's Pizza Enterprises

The journey towards security maturity starts with a single step...

MyCISO's Assess module maps your control maturity against leading frameworks, considers your risk context and business drivers, and outputs a prioritised, consultant-grade improvement strategy.

With board-ready reporting and a focus on risk reduction, Assess is your launchpad for measurable cyber uplift.

01

CONTEXT

Input information about your business and security objectives.

02

CONTROLS

Choose your preferred framework and assess control maturity.

03

RISKS

Assess your risk scenario rating to determine which risks to address first.

04

STRATEGY

Generate your consultant-grade security improvement strategy and roadmap.

NEW

Comply supports the full journey from assessment to audit-readiness for ISO 27001, with structured workflows and automation. Aligns directly to requirements, without deviation or generalisation.

Elegant Simplicity

MyCISO Assess provides the platform to assess and monitor your security improvement journey, aligned to your preferred framework. It generates executive-ready reports that offer a real-time view of what's needed to take your maturity to the next level.

Once you've established the baseline of your security posture, you can run a variety of reports to provide regular management updates on the progress of your security improvement journey.

Security control improvement

World Class Reports (in real-time)

At every milestone, generate consultant-grade reports worth tens of thousands and typically weeks in the making — in just minutes. Powered by thousands of data points and permutations, each report delivers a tailored maturity assessment, risk profile and security improvement strategy, backed by real evidence.
